

DUHOK POLYTECHNIC UNIVERSITY

Technical Institute Duhok

SINCE 1988

Our VISION

OUR GOAL

Our Vision

The Technical Institute of Duhok derives its vision from the social, political, and economic reality of the Badinan region, centred around Duhok province. Duhok is considered an emerging province in terms of industry and technology. The region felt the need to establish a high educational institution as a fundamental cornerstone for its citizens. The institute aims to equip its graduates with skills in the institute's specialities, earning the confidence of the community in its graduates.

Our Goal

The goal of establishing this scientific institution, the first higher education institution in the region, is to create a competent workforce in advanced engineering, medical, and technological fields. This workforce is trained according to globally recognized modern methodologies, leveraging scientific advancements, the telecommunications revolution, and globalization to contribute to the economic and administrative development of the region. Additionally, the aim is to elevate structures above this solid foundational block by establishing specialized colleges and institutes in technologies and sciences, which form the basis for the progress and prosperity of nations.
